## Project/Product Identification

**Project/Product Identification:** Synapse Cardiovascular 6.2.000

## 1 Conformance Statement Overview

This document is a DICOM Conformance Statement for the Synapse Cardiovascular (Synapse CV) Server.

The Synapse CV server implements capabilities in the following broad areas:

Store images and related structured report data from modalities

Respond to query / retrieve requests

Respond to Modality Worklist requests

Request and respond to requests for Storage Commitment.

Send exam data for remote archival, and retrieve archived data.

### 3 Introduction

#### 3.1 Audience

This document is written for the people that need to understand how Synapse Cardiovascular will integrate into the healthcare facility. This includes both those responsible for overall imaging network policy and architecture, as well as integrators who need to have a detailed understanding of the DICOM features of the product. Integrators are expected have knowledge adequate to fully understand the DICOM terminology, how the information in this document relates to the product's functionality, and how that functionality integrates with other devices that support compatible DICOM features.

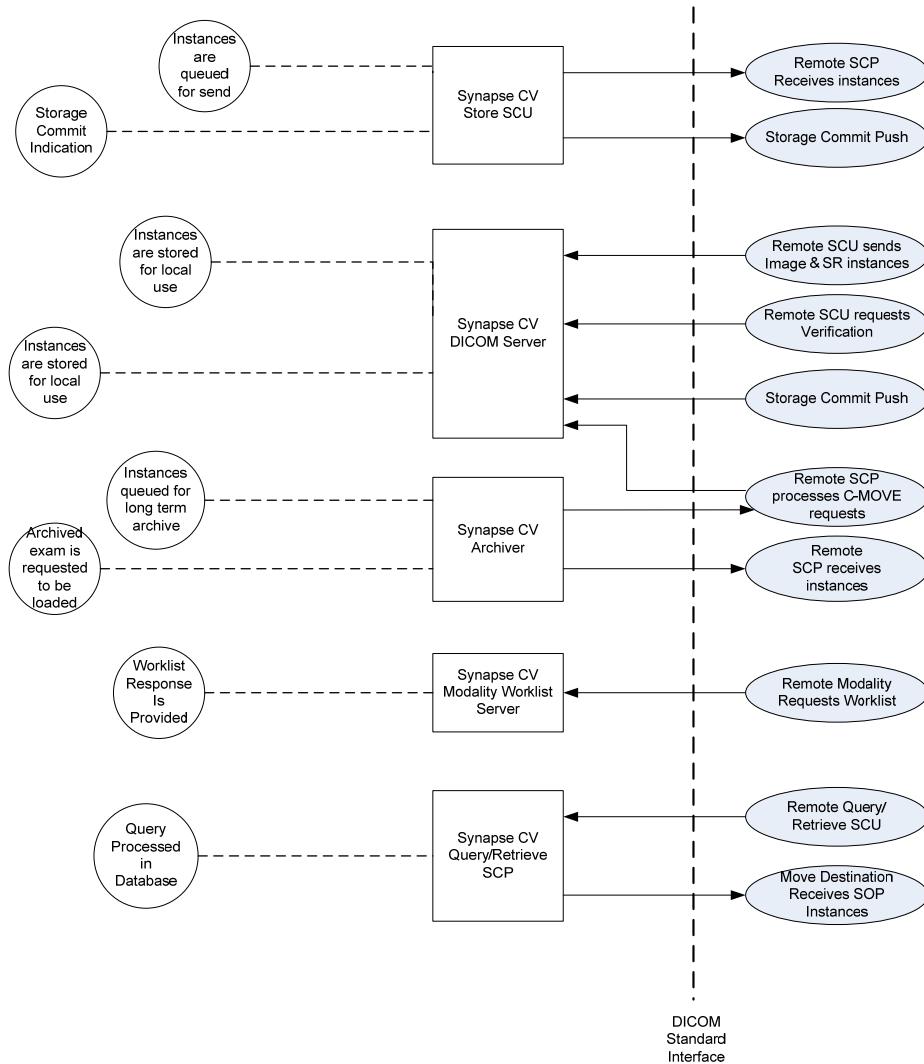

#### 3.2 Remarks

### 4 Networking

#### 4.1 Implementation Model

Synapse CV is a single application entity that will receive images and/or structured reports sent by SCUs and will be responsible for storing the images and/or structured reports. It will also respond to query/retrieve and storage commitment commands.

#### 4.1.1 Application Data Flow

#### 4.2.5 Application Entity Overview

- Synapse CV Store SCU –sends SOP Instances to a remote AE.
- Synapse CV DICOM Server – receives storage transaction from remote AEs and responds to requests for Storage Commitment. The server may run multiple instances of this service, each running on a discrete TCP port.
- Synapse CV Archiver –sends SOP Instances to a remote storage SCP for external archival. It also initiates C-MOVE transactions from the archive when a user initiates loading of an archived exam.
- Synapse CV Modality Worklist Server – responds to queries for Modality Worklist. The database from which responses are generated is populated from HL7 orders received by the Synapse CV server.
- Synapse CV Query/Retrieve SCP – Processes query and retrieve requests.

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

## **4.1.2 Functional Definition of Application Entities**

### **4.1.2.1 Synapse CV Store SCU Application Entity**

This service monitors a directory on the server. For each supported DICOM SOP Instance found in that directory, this AE initiates an association with a remote SCP, sends the SOP instances using a C-STORE-RQ message, and releases the association. The service runs with a dedicated configuration to send to one remote AE. For each remote AE that is to be the destination of storage services, a distinct instance of this service will be configured and running.

### **4.1.2.2 Synapse CV DICOM Server Application Entity**

This service receives SOP instances from any number of remote AEs. Association requests are accepted and the service supports the storage service class for a number of relevant SOP classes. As data arrives, selected attributes are used to modify the internal database containing patient, study, series, and instance related information. The service also supports Storage Commitment by responding to requests. Storage commitment support is enabled through product configuration.

### **4.1.2.3 Synapse CV Archiver Application Entity**

This service can be configured to send SOP instances that meet a variety of configurable criteria to a remote SCP. To accomplish this, the service initiates association requests and acts as an SCU for storage services. Separate archive tasks can be configured for data with different criteria. The initiation of this activity typically occurs on a scheduled or periodic basis that is also configurable. The service can also optionally be configured to remove data from its internal storage that has been successfully stored to an external archive. In the event that a Synapse CV user requests to load data that has been archived, this service will initiate retrieval of the archived data while the user waits for the exam to load. To accomplish this, the service initiates an association with the same remote AE that the required SOP instances were archived to, and initiates retrieval of the needed SOP instances by requesting a C-MOVE at the study level.

### **4.1.2.4 Synapse CV Modality Worklist Server Application Entity**

This service responds to Modality Worklist queries, returning records from an internal database that is populated with data received through an HL7 order management message processor. Synapse CV creates its own Study UID for each ordered study, so modalities using this interface to create a study entity will be able to create SOP instances that can be matched by Synapse CV (when received) with the ordered study.

### **4.1.2.5 Synapse CV Query/Retrieve SCP Application Entity**

This service performs 2 related functions:

Responds to queries, returning records from an internal database that is populated with data about exams stored by the server.

Responds to C-MOVE commands by initiating storage of requested SOP Instances to a remote AE.

## **4.1.3 Sequencing of Real World Activity**

Not applicable.

## **4.2 Application Entity Specifications**

### **4.2.1 Synapse Cardiovascular Store SCU Application Entity**

#### **4.2.1.1 SOP Classes**

This Application Entity provides Standard Conformance to the following DICOM SOP Classes:

## SOP CLASSES FOR STORE SCU APPLICATION ENTITY

SOP Class Name	SOP Class UID	SCU	SCP
Verification	1.2.840.10008.1.1	Yes	No
CT Image Storage	1.2.840.10008.5.1.4.1.1.2	Yes	No
MR Image Storage	1.2.840.10008.5.1.4.1.1.4	Yes	No
NM Image Storage	1.2.840.10008.5.1.4.1.1.20	Yes	No
US Image Storage	1.2.840.10008.5.1.4.1.1.6.1	Yes	No
US Multi Image Storage	1.2.840.10008.5.1.4.1.1.3.1	Yes	No
SC Image Storage	1.2.840.10008.5.1.4.1.1.7	Yes	No
Multi-frame True Color Secondary Capture Image Storage	1.2.840.10008.5.1.4.1.1.7.4	Yes	No
X-Ray Angiographic Image Storage	1.2.840.10008.5.1.4.1.1.12.1	Yes	No
X-Ray Radiofluoroscopic Image Storage	1.2.840.10008.5.1.4.1.1.12.2	Yes	No
X-Ray Angiographic Bi-Plane Image Storage	1.2.840.10008.5.1.4.1.1.12.3	Yes	No
Basic Text SR	1.2.840.10008.5.1.4.1.1.88.11	Yes	No
Enhanced SR	1.2.840.10008.5.1.4.1.1.88.22	Yes	No
Comprehensive SR	1.2.840.10008.5.1.4.1.1.88.33	Yes	No
Encapsulated PDF Storage	1.2.840.10008.5.1.4.1.1.104.1	Yes	No
Storage Commitment – Push Model	1.2.840.10008.1.20.1	Yes	No

## 4.2.1.2 Association Policies

## 4.2.1.2.1 General

The DICOM standard Application context is supported.

## DICOM APPLICATION CONTEXT

Application Context Name	1.2.840.10008.3.1.1.1
--------------------------	-----------------------

## 4.2.1.2.2 Number of Associations

The Store SCU supports one association at a time. Since multiple instances of this service may be configured to run, each instance may establish an association at the same time as other instances.

## 4.2.1.2.3 Asynchronous Nature

Asynchronous transactions are not supported.

## 4.2.1.2.4 Implementation Identifying Information

## DICOM IMPLEMENTATION CLASS AND VERSION FOR STORE SCU

Implementation Class UID	1.2.840.1015.1.27.1.2
Implementation Version Name	PSSCU 4.8.010

*Confidential and Proprietary Information.*

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

#### 4.2.1.3 Association Initiation Policy

The Store SCU initiates an association with a remote AE when a DICOM file is found in the directory that it is configured to monitor.

##### 4.2.1.3.1 Activity 1 - SOP Instance to be Sent

###### 4.2.1.3.1.1 Description and Sequencing of Activities

N/A

###### 4.2.1.3.1.2 4.2.1.3.1.2 Proposed Presentation Contexts

Only one Presentation Context will be proposed in any association initiated by the Store SCU. For the proposed Presentation Context, only one Transfer Syntax will be proposed, corresponding to the existing transfer syntax of the dataset to be sent. All possible combinations of Abstract Syntax and Transfer Syntax are represented below.

#### PROPOSED PRESENTATION CONTEXTS FOR STORE SCU

Presentation Context Table

#### 4.2.1.3.1.3 Specific Conformance for SOP Class(es)

The Store SCU has a configurable timeout in which the C-STORE-RSP message is expected to be returned. The default value is 300 seconds. Upon this timeout expiring, the Store SCU aborts the open association.

#### 4.2.1.4 Association Acceptance Policy

The Store SCU does not accept associations. No local port is configured for the service.

### 4.2.2 Synapse Cardiovascular DICOM Server Application Entity

#### 4.2.2.1 SOP Classes

This Application Entity provides Standard Conformance to the following DICOM SOP Classes:

#### SOP CLASSES FOR DICOM SERVER APPLICATION ENTITY

SOP Class Name	SOP Class UID	SCU	SCP
Verification	1.2.840.10008.1.1	No	Yes
Computed Radiography Image Storage	1.2.840.10008.5.1.4.1.1.1	No	Yes
CT Image Storage	1.2.840.10008.5.1.4.1.1.2	No	Yes
MR Image Storage	1.2.840.10008.5.1.4.1.1.4	No	Yes
Nuclear Medicine Image Storage	1.2.840.10008.5.1.4.1.1.20	No	Yes
US Image Storage	1.2.840.10008.5.1.4.1.1.6.1	No	Yes

#### 4.2.2.2 Association Policies

##### 4.2.2.2.1 General

The DICOM standard Application context is supported.

##### DICOM APPLICATION CONTEXT

Application Context Name	1.2.840.10008.3.1.1.1
--------------------------	-----------------------

##### 4.2.2.2.2 Number of Associations

The DICOM Server AE supports up to 25 simultaneous associations. Association requests in excess of the limit are not rejected, but are queued to wait for association resources to be released. A server accepting more than 25 associations can be deployed by enabling multiple instances of the DICOM Server AE.

##### 4.2.2.2.3 Asynchronous Nature

Asynchronous transactions are not supported.

#### **4.2.2.2.4 Implementation Identifying Information**

##### **DICOM IMPLEMENTATION CLASS AND VERSION FOR DICOM SERVER**

Implementation Class UID	1.2.840.1015.1.27.1.2
Implementation Version Name	PROSOLV2

#### **4.2.2.3 Association Initiation Policy**

The DICOM Server AE does not initiate association requests.

#### **4.2.2.4 Association Acceptance Policy**

Subject to the limitation on the number of simultaneous associations, the DICOM Server AE accepts any association request for which at least one proposed Presentation Context is supported. The DICOM Server does not check the calling or called AE titles as a criterion for association acceptance.

##### **4.2.2.4.1 Activity - SOP Instance Sent From A Peer AE**

###### **4.2.2.4.1.1 Description and Sequencing of Activities**

N/A

###### **4.2.2.4.1.2 Accepted Presentation Contexts**

##### **ACCEPTABLE PRESENTATION CONTEXTS FOR DICOM SERVER**

#### 4.2.2.4.1.3 SOP Specific Conformance for SOP Class(es)

This section includes the SOP specific behavior, i.e. error codes, error and exception handling, time-outs, etc. The information shall be as described in the SOP specific Conformance Statement section of PS 3.4 (or relevant private SOP definition).

The behavior of an Application Entity shall be summarized as shown. Standard as well as the manufacturer specific status codes and their corresponding behavior shall be specified.

#### STORAGE C-STORE RESPONSE STATUS

Service Status	Further Meaning	Error Code	Reason
Success	Success	0000	The SOP Instance did not cause any abnormal condition.
Error	Specify	C000	Error condition, SOP Instance was not stored.

#### 4.2.2.4.2 Activity – Storage Commitment Request Received

##### 4.2.2.4.2.1 Description and Sequencing of Activities

The DICOM Server AE will respond to a request for safekeeping of images / SR documents (N-ACTION-REQUEST) sent by a requesting SCU.

#### 4.2.2.4.2.2 Accepted Presentation Contexts

#### ACCEPTABLE PRESENTATION CONTEXTS FOR DICOM SERVER AND STORAGE COMMITMENT ACTIVITY

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Extended Negotiation
Name	UID	Name	UID		
Storage Commitment – Push Model	1.2.840.10008.1.20.1	Implicit VR LittleEndian	1.2.840.10008.1.2	SCP	None

#### 4.2.2.4.2.3 SOP Specific Conformance

This AE will send an N-ACTION-RESPONSE in response to the storage commitment request. On the same association that was used to receive N-ACTION-REQUEST, this AE will send N-EVENT-REPORT containing a Referenced sequence of all SOP instances that were committed for storage. Any SOP instances not found in the server database will be returned as part of Failed sequence of the N-EVENT-REPORT. The failure reason for failed SOP instances will be set to 0x0112 (“No such object instance” as defined in PS3.7). The DICOM Server AE will wait for N-EVENT-RESPONSE from SCU for at most 200 seconds by default or as configured by the user during run-time. Files committed for storage will not be deleted unless deleted by the user explicitly. In case the SCU releases the association before receiving the N-EVENT-REPORT, the DICOM Server AE will initiate an association with the requesting peer as an SCP, and release this association upon completion of transmittal of N-EVENT-REPORT and N-EVENT-RESPONSE.

### 4.2.3 Synapse Cardiovascular Archiver Application Entity

#### 4.2.3.1 SOP Classes

This Application Entity provides Standard Conformance to the following DICOM SOP Classes:

#### SOP CLASSES FOR ARCHIVER APPLICATION ENTITY

SOP Class Name	SOP Class UID	SCU	SCP
Verification	1.2.840.10008.1.1	Yes	No
Computed Radiography Image Storage	1.2.840.10008.5.1.4.1.1.1	Yes	No
CT Image Storage	1.2.840.10008.5.1.4.1.1.2	Yes	No
MR Image Storage	1.2.840.10008.5.1.4.1.1.4	Yes	No
Nuclear Medicine Image Storage	1.2.840.10008.5.1.4.1.1.20	Yes	No
US Image Storage	1.2.840.10008.5.1.4.1.1.6.1	Yes	No
US Multi Image Storage	1.2.840.10008.5.1.4.1.1.3.1	Yes	No
US Image Storage (retired)	1.2.840.10008.5.1.4.1.1.6	Yes	No
US Multi Image Storage (retired)	1.2.840.10008.5.1.4.1.1.3	Yes	No
SC Image Storage	1.2.840.10008.5.1.4.1.1.7	Yes	No

Study Root Query/Retrieve Information Model – FIND	1.2.840.10008.5.1.4.1.2.2.1	Yes	No
Study Root Query/Retrieve Information Model – MOVE	1.2.840.10008.5.1.4.1.2.2.2	Yes	No

### 4.2.3.2 Association Policies

#### 4.2.3.2.1 General

The DICOM standard Application context is supported.

#### DICOM APPLICATION CONTEXT

Application Context Name	1.2.840.10008.3.1.1.1
--------------------------	-----------------------

*Confidential and Proprietary Information.*

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

#### 4.2.3.2.2 Number of Associations

The Archiver AE supports 1 association at a time. If multiple Archiver instances (jobs) are configured to run, they will run serially so that multiple associations will not occur.

#### 4.2.3.2.3 Asynchronous Nature

Asynchronous transactions are not supported.

#### 4.2.3.2.4 Implementation Identifying Information

##### DICOM IMPLEMENTATION CLASS AND VERSION FOR ARCHIVER

Implementation Class UID	1.2.840.1015.1.27.1.2
Implementation Version Name	QSCP 1.00.000

#### 4.2.3.3 Association Initiation Policy

##### 4.2.3.3.1 Activity - SOP Instances To Be Archived

###### 4.2.3.3.1.1 Description and Sequencing of Activities

The Archiver AE will archive SOP Instances in two situations:

1. Scheduled initiation of study archiving by a configured archive job.
2. Manual initiation of study archiving. This is initiated manually by an administrative user.

The behavior of the Archiver AE in both of these cases is identical. When studies are identified for archival, an association is negotiated to support the storage of the relevant SOP instances.

###### 4.2.3.3.1.2 Proposed Presentation Contexts

##### PROPOSED PRESENTATION CONTEXTS FOR ARCHIVER AE AND SOP INSTANCE ARCHIVE ACTIVITY

### 4.2.3.3.1.3 SOP Specific Conformance for SOP Class(es)

If any SOP Instance for the study fails to be stored successfully by the SCP, the exam on Synapse Cardiovascular will not be marked archived, and a retry will occur at a later time.

*Confidential and Proprietary Information.*

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

**STORAGE C\_STORE RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has successfully stored the SOP Instance.  If all SOP Instances in a study have been stored with status success then the exam is internally flagged as archived, and any configured archiver task for deleting archived studies is enabled for that study.
*	*	Any other status code.	The SOP Instance is assumed to have not been successfully received, and the study cannot be flagged as archived until all SOP Instances of the study are subsequently stored with Success status.

**4.2.3.3.2 Activity - Exam To Be Retrieved****4.2.3.3.2.1 Description and Sequencing of Activities**

The Archiver AE will retrieve SOP instances previously archived when a Synapse Cardiovascular client user requests loading of an exam that no longer resides on the Synapse Cardiovascular server (due to having been archived and deleted locally).

**4.2.3.3.2.2 Proposed Presentation Contexts**

Although a large set of Presentation Contexts is proposed in the Association negotiation, only the Presentation Context encapsulating the Study Root Query/Retrieve Information Model – MOVE Abstract Syntax is utilized to retrieve studies.

**PROPOSED PRESENTATION CONTEXTS FOR ARCHIVER AE AND STUDY RETRIEVAL ACTIVITY**

#### 4.2.3.4 Association Acceptance Policy

The Archiver does not accept association requests.

### 4.2.4 Synapse Cardiovascular Modality Worklist Application Entity

#### 4.2.4.1 SOP Classes

This Application Entity provides Standard Conformance to the following DICOM SOP Classes:

#### SOP CLASSES FOR MODALITY WORKLIST APPLICATION ENTITY

SOP Class Name	SOP Class UID	SCU	SCP
Verification	1.2.840.10008.1.1	No	Yes
Modality Worklist Information Model – Find	1.2.840.10008.5.1.4.31	No	Yes

#### 4.2.4.2 Association Policies

##### 4.2.4.2.1 General

The DICOM standard Application context is supported.

#### DICOM APPLICATION CONTEXT

Application Context Name	1.2.840.10008.3.1.1.1
--------------------------	-----------------------

##### 4.2.4.2.2 Number of Associations

The Modality Worklist AE does not support multiple simultaneous associations.

##### 4.2.4.2.3 Asynchronous Nature

Asynchronous transactions are not supported.

##### 4.2.4.2.4 Implementation Identifying Information

*Confidential and Proprietary Information.*

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

**DICOM IMPLEMENTATION CLASS AND VERSION FOR MODALITY WORKLIST AE**

Implementation Class UID	1.2.840.1015.1.27.1.2
Implementation Version Name	QSCP 1.00.000

**4.2.4.3 Association Initiation Policy**

The Store SCU does not initiate association requests.

**4.2.4.4 Association Acceptance Policy**

Subject to the limitation on the number of simultaneous associations, the Modality Worklist AE accepts any association request for which at least one proposed Presentation Context is supported. If acceptable AE Titles have not been configured for the service, the Modality Worklist AE does not check the calling or called AE titles as a criterion for association acceptance. If a list of one or more acceptable AE Titles has been configured, an association request only from one of the configured calling AE Titles will be accepted.

Note that in the current implementation, a range of Abstract Syntaxes utilizing the storage service class will be accepted at association negotiation, if proposed. However, these Abstract Syntaxes are not applicable to the functionality of the Modality Worklist AE, and if a subsequent message is received for any of these Abstract Syntaxes, an error will be returned to the SCU. For this reason, the table of Acceptable Presentation Contexts below does not include those Abstract Syntaxes.

**4.2.4.4.1 Activity – Verification Command Received**

**4.2.4.4.1.1 Description and Sequencing of Activities – Verification Activity**

A Modality sends a C-ECHO command to verify connectivity.

**4.2.4.4.1.2 Accepted Presentation Contexts – Modality Verification Activity**

**ACCEPTABLE PRESENTATION CONTEXTS FOR  
MODALITY WORKLIST AE AND VERIFICATION ACTIVITY**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Extended Negotiation
Name	UID	Name List	UID List		
Verification	1.2.840.10008.1.1	Implicit VR Little Endian  Explicit VR Little Endian  Explicit VR Big Endian	1.2.840.10008.1.2 1.2.840.10008.1.2.2 1.2.840.10008.1.2.1	SCP	None

**4.2.4.4.1.3 SOP Specific Conformance for Verification SOP Class**

N/A

---

*Confidential and Proprietary Information.*

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

#### **4.2.4.4.2 Activity – Modality Worklist Query Received**

##### **4.2.4.4.2.1 Description and Sequencing of Activities – Modality Worklist Activity**

The Modality Worklist AE responds to queries with worklist records representing ordered studies known to the Synapse Cardiovascular system. Information about ordered studies is accumulated from HL7 ORM message(s). For each order received, Synapse Cardiovascular assigns a new, locally generated Study Instance UID to the study, regardless of any information contained in the order message. This Study Instance UID is provided as part of the response to Modality Worklist queries.

##### **4.2.4.4.2.2 Accepted Presentation Contexts – Modality Worklist Activity**

#### **ACCEPTABLE PRESENTATION CONTEXTS FOR MODALITY WORKLIST AE AND MODALITY WORKLIST QUERY RECEIVED ACTIVITY**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Extended Negotiation
Name	UID	Name List	UID List		
Modality Worklist Information Model – FIND	1.2.840.10008.5.1.4.31	Implicit VR LittleEndian Explicit VR LittleEndian Explicit VR BigEndian	1.2.840.10008.1.2. 1.2.840.10008.1.2. 1.2.840.10008.1.2. 1	SCP	None

##### **4.2.4.4.2.3 SOP Specific Conformance for Modality Worklist SOP Class**

For each C-FIND request received, this AE returns records including all matching and return attributes for the requested query level and higher.

This AE supports only the matching keys identified in the following table.

#### **MODALITY WORKLIST MATCHING KEYS SUPPORTED**

Description/Module	Tag	Remark
<b>Scheduled Procedure Step</b>		
>Scheduled Station AE Title	(0040,0001)	
>Scheduled Procedure Step Start Date	(0040,0002)	
>Scheduled Procedure Step Start Time	(0040,0003)	
<b>Patient</b>		
Patient Name	(0010,0010)	
Patient ID	(0010,0020)	

This AE always returns all of the attributes listed in the following table.

## MODALITY WORKLIST C-FIND RESPONSE STATUS REASONS

Service Status	Further Meaning	Error Code	Reasons
Success	Matching is complete	0000	The response status code and meaning are logged in the job log file.
Failure	Unable to process	C001	This status is returned due to internal errors within this AE, such as a processing failure response on a query of the database. The response status code and meaning are logged.
Pending	Matching is continuing	FF00	The status is returned with each matching response. A message is logged for each pending response.

## 4.2.5 Synapse Cardiovascular Query/Retrieve SCP Application Entity

### 4.2.5.1 SOP Classes

This Application Entity provides Standard Conformance to the following DICOM SOP Classes:

#### SOP CLASSES FOR QUERY/RETRIEVE APPLICATION ENTITY

SOP Class Name	SOP Class UID	SCU	SCP
Verification	1.2.840.10008.1.1	Yes	Yes
Patient Root Query/Retrieve Information Model – FIND	1.2.840.10008.5.1.4.1.2.1.1	No	Yes
Patient Root Query/Retrieve Information Model – MOVE	1.2.840.10008.5.1.4.1.2.1.2	No	Yes
Patient Root Query/Retrieve Information Model – GET	1.2.840.10008.5.1.4.1.2.1.3	No	Yes
Study Root Query/Retrieve Information Model – FIND	1.2.840.10008.5.1.4.1.2.2.1	No	Yes
Study Root Query/Retrieve Information Model – MOVE	1.2.840.10008.5.1.4.1.2.2.2	No	Yes
Study Root Query/Retrieve Information Model – GET	1.2.840.10008.5.1.4.1.2.2.3	No	Yes
Patient/Study Only Query/Retrieve Information Model - FIND (Retired)	1.2.840.10008.5.1.4.1.2.3.1	No	Yes
Patient/Study Only Query/Retrieve Information Model – MOVE (Retired)	1.2.840.10008.5.1.4.1.2.3.2	No	Yes
Patient/Study Only Query/Retrieve Information Model - GET (Retired)	1.2.840.10008.5.1.4.1.2.3.3	No	Yes
Computed Radiography Image Storage	1.2.840.10008.5.1.4.1.1.1	Yes	No
CT Image Storage	1.2.840.10008.5.1.4.1.1.2	Yes	No
MR Image Storage	1.2.840.10008.5.1.4.1.1.4	Yes	No
Secondary Capture Image Storage	1.2.840.10008.5.1.4.1.1.7	Yes	No

Confidential and Proprietary Information.

Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited

Multi-frame True Color Secondary Capture Image Storage	1.2.840.10008.5.1.4.1.1.7.4	Yes	No
Ultrasound Multi-frame Image Storage	1.2.840.10008.5.1.4.1.1.3.1	Yes	No
Ultrasound Image Storage	1.2.840.10008.5.1.4.1.1.6.1	Yes	No
Ultrasound Multi-frame Image Storage (Retired)	1.2.840.10008.5.1.4.1.1.3	Yes	No
Ultrasound Image Storage (Retired)	1.2.840.10008.5.1.4.1.1.6	Yes	No
X-Ray Angiographic Bi-Plane Image Storage (Retired)	1.2.840.10008.5.1.4.1.1.12.3	Yes	No
X-Ray Angiographic Image Storage	1.2.840.10008.5.1.4.1.1.12.1	Yes	No
Nuclear Medicine Image Storage	1.2.840.10008.5.1.4.1.1.20	Yes	No
Nuclear Medicine Image Storage (Retired)	1.2.840.10008.5.1.4.1.1.5	Yes	No
Encapsulated PDF Storage	1.2.840.10008.5.1.4.1.1.104.1	Yes	No

#### 4.2.5.2 Association Policies

##### 4.2.5.2.1 General

The DICOM standard Application context is supported.

##### DICOM APPLICATION CONTEXT

Application Context Name	1.2.840.10008.3.1.1.1
--------------------------	-----------------------

##### 4.2.5.2.2 Number of Associations

##### 4.2.5.2.2 DICOM Q/R Association Acceptance

The application supports multiple SCP tasks, and for each port it supports isolated SCP configurations. Each such task operates as one single SCP. Each such SCP can handle a configurable number of simultaneous DICOM Q/R associations. Configurations affecting this behavior are listed below

Configuration	Default	Description
Max allowed connection	20	Maximum number of simultaneous DICOM associations that can be handled by the software. Default value is 20. Using a value beyond this is not recommended as this can degrade performance. Once the SCP is already catering to maximum configured simultaneous number of service requests, every new association request shall be responded with an A-ABORT with code as 'Reason not specified'

##### 4.2.5.2.3 Asynchronous Nature

Asynchronous transactions are not supported.

#### 4.2.5.2.4 Implementation Identifying Information

##### DICOM IMPLEMENTATION CLASS AND VERSION FOR QUERY/RETRIEVE AE

Implementation Class UID	1.2.840.1015.1.27.1.2
Implementation Version Name	QSCP 1.00.000

#### 4.2.5.3 Association Initiation Policy

##### 4.2.5.3.1 Activity – Send Images Requested by an External Peer AE

###### 4.2.5.3.1.1 Description and Sequencing of Activity

The Query Retrieve initiates association requests in order to fulfill C-MOVE requests by an external peer AE.

Note that the Archive AE implements its own Storage SCU functionality and this does not replicate the behavior of the Store SCU AE described elsewhere in this document.

###### 4.2.5.3.1.2 Proposed Presentation Contexts

Although only a small number of Presentations will typically be used to perform this activity for any particular study, all of the Presentation Contexts listed in the following table are proposed.

##### PROPOSED PRESENTATION CONTEXTS BY THE QUERY/RETRIEVE AE

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Ext. Neg.
Name	UID	Name	UID		
Verification	1.2.840.10008.1.1	Explicit VR LittleEndian	1.2.840.10008.1.2.1	SCU	None
Verification	1.2.840.10008.1.1	Implicit VR LittleEndian	1.2.840.10008.1.2	SCU	None
Verification	1.2.840.10008.1.1	Explicit VR BigEndian	1.2.840.10008.1.2.2	SCU	None

#### 4.2.5.3.1.3 SOP Specific Conformance for Image Storage by Query/Retrieve AE

##### STORAGE C-STORE RESPONSE STATUS HANDLING BEHAVIOR

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has successfully stored the SOP Instance. If all SOP Instances in a send job have status success then a Success status is returned to the C-MOVE SCU that requested the storage activity.

Confidential and Proprietary Information.

Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited

*	*	Any other status code.	The SCP did not successfully store the SOP Instance. An error code is returned to the C-MOVE SCU that requested the storage activity.
---	---	------------------------	---

#### 4.2.5.4 Association Acceptance Policy

Subject to the limitation on the number of simultaneous associations, the Query/Retrieve AE accepts any association request for which at least one proposed Presentation Context is supported. If acceptable AE Titles have not been configured for the service, the Query/Retrieve AE does not check the calling or called AE titles as a criterion for association acceptance. If a list of one or more acceptable AE Titles has been configured, an association request only from one of the configured calling AE Titles will be accepted.

Note that in the current implementation, a range of Abstract Syntaxes utilizing the storage service class will be accepted at association negotiation, if proposed. However, these Abstract Syntaxes are not applicable to the functionality of the Query/Retrieve AE, and if a subsequent message is received for any of these Abstract Syntaxes, an error will be returned to the SCU. For this reason, the table of Acceptable Presentation Contexts below does not include those Abstract Syntaxes.

##### 4.2.5.4.1 Activity – Verification Command Received

###### 4.2.5.4.1.1 Description and Sequencing of Activities – Verification Activity

A remote AE sends a C-ECHO message to verify connectivity with this AE.

## 4.2.5.4.1.2 Accepted Presentation Contexts – Modality Verification Activity

ACCEPTABLE PRESENTATION CONTEXTS FOR  
QUERY/RETRIEVE AE AND VERIFICATION ACTIVITY

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Extended Negotiation
Name	UID	Name List	UID List		
Verification	1.2.840.10008.1 .1	Implicit VR Little Endian Explicit VR Little Endian Explicit VR Big Endian	1.2.840.10008.1.2 1.2.840.10008.1.2.2 1.2.840.10008.1.2.1	SCP	None

## 4.2.5.4.1.3 SOP Specific Conformance for Verification SOP Class

N/A

## 4.2.5.4.2 Activity – Query Received

## 4.2.5.4.2.1 Description and Sequencing of Activities – Query Activity

The Query/Retrieve AE receives a C-FIND request from a remote AETitle. It reads the value for 'C-FIND Patient/Study level MAX records' configured by administrator for the QR task. This configuration indicates Max number of records returned as part of a Patient level or Study level C-FIND query. Default value is 100. Q/R AE queries the database and if the matching results are more than the configured value, then the AE sends back a C-FIND response message with the value A700 in the 0000,0900 (Status) tag with description in 0000,0902 as 'Results exceed configured maximum number of responses'. Calling AE may then close the association or start a new query. If the results do not exceed the configured number of records, then AE responds to queries with records representing studies managed by the Synapse Cardiovascular system.

## 4.2.5.4.2.2 Accepted Presentation Contexts – Query Activity

ACCEPTABLE PRESENTATION CONTEXTS FOR  
QUERY/RETRIEVE AE AND QUERY RECEIVED ACTIVITY

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Extended Negotiation
Name	UID	Name List	UID List

#### 4.2.5.4.2.3 SOP Specific Conformance for Query/Retrieve C-FIND

For each C-FIND request received, this AE returns records including all matching and return attributes for the requested query level and higher.

This AE supports only the matching keys identified in the following table.

QUERY/RETRIEVE MATCHING KEYS SUPPORTED

Description/Module	Tag	Remark
<b>Patient Level</b>		
Patient Name	(0010,0010)	
Patient ID	(0010,0020)	
<b>Study Level</b>		
Study Instance UID	(0020,000D)	Multiple Study Instance UIDs supported
Study ID	(0020,0010)	
Study Date	(0008,0020)	Study Date Attribute does not support wild card and non numerical characters
Study Time	(0008,0030)	Study Time Attribute does not support wild card and non numerical characters
Modalities in Study	(0008,0061)	Used for matching only in the case that Modality (0008,0060) is not present in the C-FIND request. If Modalities in Study is used, only the first value is matched in the case where multiple values are received in the C-FIND request.

*Confidential and Proprietary Information.*

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

**Synapse Cardiovascular DICOM  
Conformance Statement****DOC-0038619-B**

Page 75 of 82

Accession Number	(0008,0050)	
<b>Series Level</b>		
Series Instance UID	(0020,000E)	Multiple Series Instance UIDs supported
Modality	(0008,0060)	
Series Number	(0020,0011)	Series Number Attribute does not support wild card characters
<b>Image Level</b>		
SOP Instance UID	(0008,0018)	Multiple SOP Instance UIDs supported
Instance Number	(0020,0013)	Instance Number Attribute does not support wild card characters

In addition to returning matching key values identified above, this AE supports additional return key attributes listed in the following table.

**QUERY/RETRIEVE RETURN KEYS SUPPORTED**

Description/Module	Tag	Remark
<b>Patient Level</b>		
Patient's Birth Date	(0010,0030)	
Patient's Sex	(0010,0040)	
<b>Study Level</b>		
Referring Physician's Name	(0008,0090)	
Study Description	(0008,1030)	
Patient's Age	(0008,1010)	
Patient's Size	(0008,1020)	
Patient's Weight	(0008,1030)

Number of Frames	(0028,0008)	

---

*Confidential and Proprietary Information.**Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

This AE returns C-FIND response statuses as specified below.

**QUERY/RETRIEVE C-FIND RESPONSE STATUS REASONS**

Service Status	Further Meaning	Error Code	Reasons
Success	Matching is complete	0000	The query has completed without errors.
Failure	Unable to process	C001	This status indicates internal errors such as a processing failure response on a query of the database. Information about the error is logged.
	Missing request attribute	C002	This status indicates that a required attribute is missing from the C-FIND request and processing cannot be completed.
	Too many matches	A700	This status indicates that a C-FIND PATIENT LEVEL or PATIENT ROOT STUDY LEVEL query resulted in number of responses exceeding the configuration “C-FIND Patient/Study level MAX records” for the Q/R Task. Description in DICOM Tag(0000,0902)shall be added in response with a string ” Results exceed configured maximum number of responses”
		A701	This status indicates that a C-FIND SERIES LEVEL or IMAGE LEVEL query resulted in number of responses exceeding the configuration “C-FIND Series/Image level/C-MOVE MAX records”. Description in DICOM Tag(0000,0902)shall be added in response with a string ” Results exceed configured maximum number of responses”
Canceled	Matching terminated due to cancel request	FE00	This status is returned if a Cancel Request is received from the SCU during the processing of a C-FIND request. The response status code and meaning are logged in the job log file.
Pending	Matching is continuing	FF00	The status is returned with each matching response. A message is logged for each pending response.

If series number is part of the DICOM query and it is received as an invalid value (as per the standard), then the application treats it as a query that's equivalent to containing wild card for series number. The results will be equivalent to the results that would be returned to SCU in the case of empty or wildcard values mentioned in the same tag during query.

**4.2.5.4.3 Activity – C-MOVE Command Received****4.2.5.4.3.1 Description and Sequencing of Activities – C-MOVE Request Received**

A remote AE sends a C-MOVE message, typically but not always following a query using C-FIND.

## 4.2.5.4.3.2 Accepted Presentation Contexts – C-MOVE

ACCEPTABLE PRESENTATION CONTEXTS FOR  
QUERY/RETRIEVE AE AND QUERY RECEIVED ACTIVITY

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Extended Negotiation
Name	UID	Name List	UID List		
Patient Root Query/Retrieve Information Model – MOVE	1.2.840.10008.5.1.4.1.2.1.2	Implicit VR Little Endian Explicit VR Little Endian Explicit VR Big Endian	1.2.840.10008.1.2 1.2.840.10008.1.2.2 1.2.840.10008.1.2.1	SCP	None
Study Root Query/Retrieve Information Model – MOVE	1.2.840.10008.5.1.4.1.2.2.2	Implicit VR Little Endian Explicit VR Little Endian Explicit VR Big Endian	1.2.840.10008.1.2 1.2.840.10008.1.2.2 1.2.840.10008.1.2.1	SCP	None
Patient/Study Only Query/Retrieve Information Model – MOVE (Retired)	1.2.840.10008.5.1.4.1.2.3.2	Implicit VR Little Endian Explicit VR Little Endian Explicit VR Big Endian	1.2.840.10008.1.2 1.2.840.10008.1.2.2 1.2.840.10008.1.2.1	SCP	None

## 4.2.5.4.3.3 SOP Specific Conformance for Query/Retrieve C-MOVE

For each C-MOVE request received, this AE initiates a separate association and performs the requested storage operations.

This AE returns C-MOVE response values as follows:

## QUERY/RETRIEVE C-MOVE RESPONSE STATUS REASONS

Service Status	Further Meaning	Error Code	Reasons
Success	Matching is complete	0000	The query has completed without errors.
Failure	Refused: Out of Resources – Unable to calculate number	A701	<p>This status indicates that AE encountered errors and processing cannot be completed.</p> <p>This status might also occur when a C-MOVE request resulted in number of responses exceeding the configuration</p>

Confidential and Proprietary Information.

Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited

	<i>of matches</i>		<b>"C-FIND Series/Image level/C-MOVE MAX records".</b> If this is the case then, description in DICOM Tag(0000,0902)shall be added in response with a string "Results exceed configured maximum number of responses"
	<i>Refused: Out of Resources – Unable to perform sub-operations</i>	A702	<i>This status indicates that AE encountered errors while processing the request and further processing cannot be completed.</i>
	<i>Refused: Move Destination unknown</i>	A801	<i>This status indicates that the Move Destination, required for processing C-Store request, is not known.</i>
	<i>Missing request attribute</i>	A900	<i>This status indicates that a required attribute is missing from the C-MOVE request and processing cannot be completed.</i>
	<i>Unable to process</i>	C00C	<i>This status indicates internal errors such as a processing failure response on a query of the database. Information about the error is logged.</i>
<i>Cancelled</i>	<i>Matching terminated due to cancel request</i>	FE00	<i>This status is returned if a Cancel Request is received from the SCU during the processing of a C-MOVE request. The response status code and meaning are logged in the job log file.</i>
<i>Pending</i>	<i>Matching is continuing</i>	FF00	<i>The status is returned with after each attempted storage command, including the counts of successful, failed, and pending instances to be stored.</i>

#### 4.2.5.5 Deviations from DICOM Standard

Following are the deviations from DICOM Standard

##### Deviations

Information Model	Attribute	Tag	Remark
<b>Study Level</b>			
Patient Root	Study Instance UID Accession Number	(0020,000D) (0008,0050)	Unique attributes for Patient Level will not be returned in the C-FIND SCP Response (Patient ID)
Study Root	Study Instance UID Accession Number	(0020,000D) (0008,0050)	Patient Name will be returned in the C-FIND SCP Response even if it is not requested.

Confidential and Proprietary Information.

Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited

			<i>Request will be processed even if the Patient Level required attributes are not requested in the query.</i>
<b><i>Series Level</i></b>			
Patient Root	<i>Series Instance UID</i> <i>Series Number</i>	(0020,000E) (0020,0011)	<i>Unique attributes for Patient Level and Study Level will not be returned in the C-FIND SCP Response (Patient ID and Study Instance UID)</i>
Study Root	<i>Series Instance UID</i> <i>Series Number</i>	(0020,000E) (0020,0011)	<i>Unique attributes for Study Level will not be returned in the C-FIND SCP Response (Study Instance UID)</i>
<b><i>Image Level</i></b>			
Patient Root	<i>SOP Instance UID</i>	(0008,0018)	<i>Unique attributes for Patient, Study and Series Levels will not be returned in the C-FIND SCP Response (Patient ID, Study Instance UID and Series Instance UID)</i>
Study Root	<i>SOP Instance UID</i>	(0008,0018)	<i>Unique attributes for Study and Series Levels will not be returned in the C-FIND SCP Response (Study Instance UID and Series Instance UID)</i>

## 4.3 Network Interfaces

### 4.3.1 Physical Network Interface

Synapse Cardiovascular supports any network interface that implements the TCP transport layer protocol. TCP services are expected to be provided by the operating system.

### 4.3.2 Additional Protocols

N/A

---

*Confidential and Proprietary Information.*

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

#### 4.3.3 IPv4 and IPv6 Support

Synapse Cardiovascular currently supports only IPv4. IPv6 support is expected in a future version.

### 4.4 Configuration

#### 4.4.1 AE Title/Presentation Address Mapping

##### 4.4.1.1 Local AE Titles.

**AE TITLE CONFIGURATION TABLE**

Application Entity	Default AE Title	Default TCP/IP Port
Store SCU	SYNAPSECVSCU	N/A
DICOM Server	SYNAPSECV	104
Q/R SCP	SYNAPSECV_QRSCP	1024
Modality Worklist Server	SYNAPSECVMWL	112
Archiver	None	N/A

##### 4.4.1.2 Remote AE Title/Presentation Address Mapping

###### 4.4.1.2.1 Remote Storage SCP for Synapse CV Store SCU

Configuration of storage SCP AEs is done for use by the Synapse Cardiovascular Store SCU AE. Each instance of the Store SCU AE communicates with exactly one remote AE, and all connection parameters are explicitly configured for that remote AE in the configuration information of the individual SCU instance. For this reason, no mapping is performed between AE Title and presentation addresses.

###### 4.4.1.2.2 Remote Storage SCP for Synapse CV DICOM Server

Since the DICOM Server does not communicate with a remote SCP, no address mapping capability is relevant.

###### 4.4.1.2.3 Remote Storage SCP for Synapse CV Query/Retrieve SCP

The Query/Retrieve SCP requires a list of potential storage service class providers that will be supported for SOP Instance storage upon request by a Q/R SCU peer AE. Configuration of this list is performed in the configuration of individual Query/Retrieve tasks. A GUI is provided to configure a collection of "Destination Store SCPs", including AE Title, Port, and IP Address or a host name resolvable to an IP address. When the SCP receives a C-MOVE request, the retrieve AE in the request is found in the configured list and the remaining connection parameters are extracted for that peer AE.

###### 4.4.1.2.4 Remote SCP for Synapse CV Archiver

The Archiver accesses configuration information for 3 types of actors in its workflow, including a Storage SCP, Storage SCU, and Query/Retrieve SCP. A facility for configuring a set of these nodes is accessed through the GUI provided in the Synapse CV Service Manager to set up archive jobs. Peer AE entities are configured, each including a Name to be used in the GUI, IP Address, AE Title, Port, and Service Type (role of the actor). After the list of nodes is established, when selecting among the configured Peer AEs, the specific archive job configuration provides the ability to select each node by Name. In this way, when the job runs it can access the remaining configuration information for that peer AE to execute its required communications.

#### 4.4.2 Parameters

**CONFIGURATION PARAMETERS TABLE**

Parameter	Configurable (Yes/No)	Default Value
<b>General Parameters</b>		
Maximum number of allowed simultaneous DICOM associations/TCP connections	Yes	20
Time-out waiting for acceptance or rejection Response to an Association Open Request. (Application Level timeout) for DICOM Storage SCP	Yes	200 sec.
General DIMSE level time-out values) for DICOM Storage SCP	Yes	200 sec.
Time-out waiting for response to TCP/IP connect request. ) for DICOM Storage SCP (Low-level timeout)	Yes	200 sec.
Time-out waiting for acceptance or rejection Response to an Association Open Request. (Application Level timeout) for DICOM Query Retrieve SCP	Yes	300 sec.
General DIMSE level time-out values) for DICOM Query Retrieve SCP	Yes	300 sec.
Time-out waiting for response to TCP/IP connect request. ) for DICOM Query Retrieve SCP (Low-level timeout)	Yes	300 sec.
Acceptable CALLING AE Titles for DICOM QR	Yes (List)	Empty list
Acceptable DESTINATION AE Titles for DICOM QR	Yes (List)	Empty list
Maximum number of records that shall be returned in a PATIENT/STUDY level C-FIND	Yes	100
Maximum number of records that shall be returned in a SERIES/IMAGE level C-FIND	Yes	3000
Maximum number of images that shall be returned in a C-MOVE	Yes	Same configuration as above
Enable Storage Commitment (DICOM STORAGE SCU)	Yes	False
Storage Commitment Port (DICOM STORAGE SCU)	Yes	104
Enable Storage Commitment (DICOM STORAGE SCP)	Yes	Disabled
<b>AE Specific Parameters</b>		
Maximum PDU size the AE can receive	Yes	DICOM Server: 163,840 bytes All others: 163,84 bytes
Maximum PDU size the AE can send	No	Max PDU Size

*Confidential and Proprietary Information.*

*Use, Duplication or Distribution of this document without permission from FUJIFILM Medical Systems U.S.A., Inc., is strictly prohibited*

Parameter	Configurable (Yes/No)	Default Value
<b>General Parameters</b>		
		Negotiated by Peer AE

## 5 Media Interchange

The Synapse Cardiovascular Server does not support media interchange.

## 6 Support of Character Sets

This version of Synapse Cardiovascular Server supports the default character repertoire only.

## 7 Security

### 7.1 Security Profiles

Security profiles as defined in DICOM PS 3.15 are not supported by the Synapse Cardiovascular Server.

### 7.2 Association Level Security

The Synapse Cardiovascular Query Retrieve SCP Application Entity may optionally be configured to accept association requests only from known AE Titles. If no list of acceptable AE Titles is configured, the service will accept and process requests from any SCU.

### 7.3 Application Level Security

Access to the Synapse Cardiovascular Server desktop is controlled by operating system level user access control.

## 8 Annexes
